1 Introduction and Safety

1.1 Introduction

Purpose of this manual

This manual provides information on how to do the following in the correct manner:
• Installation
• Operation
• Maintenance.

CAUTION:
This manual is an integral part of the unit. Be sure to read and understand the manual before installing the unit and putting it to use. The manual must always be made available to the user, stored in the proximity of the unit, and well kept.

Supplementary instructions

The instructions and warnings of this manual apply to the standard unit as described in the sale documentation. Special version pumps may be supplied with supplementary instruction manuals. For situations not considered in the manual or in the sales document, contact Xylem or the Authorised Distributor.

1.2 Safety

1.2.1 Danger levels and safety symbols

Before using the unit, the user must read, understand and comply with the indications of the danger warnings in order to avoid the following risks:
• Injuries and health hazards
• Damage to the product
• Unit malfunction.

Danger levels

<table>
<thead>
<tr>
<th>Hazard level</th>
<th>Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DANGER:</strong></td>
<td>It identifies a dangerous situation which, if not avoided, causes serious injury, or even death.</td>
</tr>
<tr>
<td><strong>WARNING:</strong></td>
<td>It identifies a dangerous situation which, if not avoided, may cause serious injury, or even death.</td>
</tr>
<tr>
<td><strong>CAUTION:</strong></td>
<td>It identifies a dangerous situation which, if not avoided, may cause small or medium level injuries.</td>
</tr>
<tr>
<td><strong>NOTICE:</strong></td>
<td>It identifies a situation which, if not avoided, may cause damage to property but not to people.</td>
</tr>
</tbody>
</table>
1.2.2 User safety

Strictly comply with current health and safety regulations.

**WARNING:**
This unit must be used only by qualified users. Qualified users are people able to recognise the risks and avoid hazards during installation, use and maintenance of the unit.

**Inexperienced users**

**WARNING:**
- For EU countries: this product may be used by children aged 8 years and above and persons with reduced physical, sensory or mental capabilities, or who lack experience and knowledge, provided that they are being supervised and have been instructed on how to use it safely, and understand the hazards involved. Children must not play with the product. Cleaning and maintenance must not be carried out by children without supervision.
- For countries outside the EU: this product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or who lack experience and knowledge, unless they are being supervised and have been instructed on how to use it by a person responsible for their safety. Children should be supervised to ensure that they do not play with the product.
1.2.3 Protection of the environment
Disposal of packaging and product

Comply with the current regulations on sorted waste disposal.

1.2.4 Sites exposed to ionizing radiations

WARNING: Ionizing radiation hazard
If the unit has been exposed to ionizing radiations, implement the necessary safety measures for the protection of people. If the unit needs to be dispatched, inform the carrier and the recipient accordingly, so that appropriate safety measures can be put in place.
2 Handling and Storage

2.1 Handling of the packed unit

WARNING:
Take appropriate measures during transport, installation and storage to prevent contamination from external substances.

The Manufacturer delivers the unit and its components in a cardboard box.

2.2 Unit inspection upon delivery

2.2.1 Inspect the package

1. Check that quantity, descriptions and product codes match the order.
2. Check the packaging for any damage or missing components.
3. In case of immediately detectable damage or missing parts:
   - accept the goods with reserve, indicating any findings on the transport document, or
   - reject the goods, indicating the reason on the transport document.

In both cases, promptly contact Xylem or the Authorised Distributor from whom the product was purchased.

2.2.2 Unpacking and inspection of the unit

1. Remove packing materials from the product.
2. Check the unit for integrity and to make sure that there are no missing components.
3. In case of damage or missing components, promptly contact Xylem or the Authorised Distributor.

Content of the package

• Unit
• Heat insulation shell
• Two gaskets
• Supply connector
• Instructions manual.

2.3 Storage

Storage of the packed unit

The unit must be stored:
• In a covered and dry place
• Away from heat sources
• Protected from dirt
• Protected from vibrations
• At an ambient temperature between -40°C and +85°C (-40°F and 185°F).

NOTICE:
Do not place heavy loads on top of the unit.

NOTICE:
Protect the unit from collisions.
3 Technical Description

3.1 Designation

Wet rotor circulators with integrated electronic frequency converter.

3.2 Features and integrated functions

Reading and adjustment

<table>

3.3 Data plate

1. Maximum absorbed current
2. Rated voltage
3. Minimum absorbed current
4. Minimum absorbed power
5. Protection degree
6. Pump type
7. Product code
8. Serial number
9. EEI value
10. Maximum operating pressure
11. Maximum absorbed power
12. Maximum liquid operating temperature
13. Insulation class
### 3.4 Identification code

1. Series name
2. Motor power 24 W [S], 34 W [M] or 60 W [L]
3. Display present [+] or not present [ ]
4. Port nominal diameter in mm
5. Maximum head in mm
6. Distance between suction port and discharge port in mm
7. Pump body in cast iron [ ] or stainless steel [N]

### 3.5 Names of the main components

1. Pump body
2. Discharge of condensate
3. Motor body
4. Electronic drive
5. Drive display
6. Control knob
7. Socket for the power connector

#### 3.5.1 Drive display

1. Unit status LED indicator
2. Work and operating mode knob
3. Display
4. Bluetooth® wireless function LED indicator
5. Button to enable and disable night mode and the Bluetooth® wireless function
The information given on the display according to the event is shown in the table:

<table>
<thead>
<tr>
<th>Event</th>
<th>Information on the display</th>

<td>eAdapt function activated</td>
<td>EAd</td>
</tr>
<tr>
<td>Presence of a fault</td>
<td>Alphanumerical error code, see Troubleshooting on page 27</td>
</tr>
</tbody>
</table>

3.6 Intended use

- Gas, diesel oil, wood and pellet boiler
- District heating systems
- Underfloor heating systems
- Multi-zone heating systems
- Cogeneration processes
- Heat transfer stations
- Mixing stations
- Heat pumps
- Domestic hot water systems
- Air-conditioning systems.

Pumped liquids

- Clean
- Free of solid particles or fibres
- Free of mineral oils
- Chemically and mechanically non aggressive
- Non-flammable
- Non-explosive
- Water/glycol mixtures
- Water for heating according to VDI 2035
- Domestic hot water

Observe the operating limits in Technical Information on page 31.

3.7 Improper use

**WARNING:**
The unit was designed and built for the use described in the Intended Use section. Any other uses are prohibited, as they could compromise the safety of the user and the efficiency of the unit itself.

**DANGER:**
It is prohibited to use this unit to pump flammable and/or explosive liquids.

**DANGER: Potentially explosive atmosphere hazard**
It is prohibited to start the unit in environments with potentially explosive atmospheres or with combustible dusts.
**DANGER:**
In the case of domestic systems, the water must be pumped at a temperature above +50°C (122°F) to prevent the risk of legionella.

---

**DANGER:**
In the case of domestic hot water systems, flexible pipes must not be used to connect the unit to the mains water supply.

---

**CAUTION:**
It is prohibited to use this unit to pump aggressive liquids, acids and seawater.

---

### 3.8 Use in water distribution networks for human consumption

If the unit is intended for water supply to people and/or animals:

---

**WARNING:**
It is prohibited to pump drinking water after use with other fluids.

---

**WARNING:**
Take appropriate measures during transport, installation and storage to prevent contamination from external substances.

---

**WARNING:**
Remove the unit from its packaging just before installation to prevent contamination from external substances.

---

**WARNING:**
After installation, run the unit for a few minutes with several users open in order to wash the inside of the system.
4 Installation

4.1 Precautions

Before starting, make sure that the safety instructions shown in Introduction and Safety on page 5 have been fully read and understood.

**DANGER: Potentially explosive atmosphere hazard**

It is prohibited to start the unit in environments with potentially explosive atmospheres or with combustible dusts.

**WARNING:**

Always wear personal protective equipment.

**WARNING:**

Always use suitable working tools.

**WARNING:**

When selecting the place of installation and connecting the unit to the hydraulic and electric power supplies, strictly comply with current regulations.

When connecting the unit to a public or private aqueduct, or to a well for the supply of water for human and/or animal consumption:

**WARNING:**

It is prohibited to pump drinking water after use with other fluids.

**WARNING:**

Remove the unit from its packaging just before installation to prevent contamination from external substances.

4.2 Installation area

- Install the unit in a dry and well ventilated area, protected against weather conditions.
- Follow the provisions in Operating environment on page 31.

4.3 Hydraulic connection

**DANGER:**

All the hydraulic and electrical connections must be completed by a technician possessing the technical-professional requirements outlined in the current regulations.

**WARNING:**

Piping must be sized to ensure safety at the maximum operating pressure.
WARNING:
Install appropriate seals between the unit and the piping system.

4.3.1 Guidelines for hydraulic connection

• If possible, install the unit at the lowest point of the system
• Remove any welding residues, deposits and impurities in the pipes that could damage the unit.
• To exclude the unit from the system for the purpose of maintenance, install an on-off valve on the suction side and another on the delivery side
• Support the pipes independently to prevent them from weighing on the unit.
• Check that other devices cannot come in contact with the unit.

4.3.2 Assembly

CAUTION: Danger, system pressurized
Before starting work, close the on-off valves on the suction and delivery sides or drain the system.

1. Locate the arrow on the unit to determine the correct direction of the flow of liquid.
2. Insert the unit between the pipes with the gaskets.
3. Tighten the nuts in the joints.
   Tightening torque: see the table.

<table>
<thead>
<tr>
<th>Size of the joint</th>
<th>Material of the pipe</th>
<th>Torque, Nm (lbf·ft)</th>
</tr>
</thead>
<tbody>
<tr>
<td>G1</td>

<td>125 (92)</td>
</tr>
<tr>
<td>G2</td>
<td>Cast iron</td>
<td>165 (122)</td>
</tr>
</tbody>
</table>
4.3.3 Rotation of the drive display

The drive display can be turned 90° at a time.

**CAUTION: Danger, system pressurized**
Before starting work, close the on-off valves on the suction and delivery sides or drain the system.

**CAUTION:**
Residual liquid could come out of the motor body during disassembly at a very hot or cold temperature: be careful to avoid physical injury.

**CAUTION:**
Make sure not to damage the internal gasket, otherwise liquid could leak out at a very hot or cold temperature during operation of the unit.

**NOTICE:**
During disassembly, support the motor body and not the electronic drive, in order to avoid damaging the electronic drive.
1. Remove the screws.
2. Turn the motor body without detaching it from the body of the pump.
3. Fasten the screws following a cross pattern.
   Tightening torque: 3 Nm (2.2 lbf·ft).

**4.3.4 Insulation**

Install the insulation shells to reduce heat dispersion.

**NOTICE:**
Do not insulate or cover the drive display.
4.4 Electrical connection

DANGER:
All the hydraulic and electrical connections must be completed by a technician possessing the technical-professional requirements outlined in the current regulations.

DANGER: Electrical hazard
Before starting work, check that the power supply is disconnected and locked out, to avoid unintentional restart of the unit, the electronic drive and the auxiliary control circuit.

4.4.1 Ground

DANGER: Electrical hazard
Always connect the external protection conductor (ground) to the ground terminal before attempting to make any other electrical connections.

DANGER: Electrical hazard
Check that the external protection conductor (ground) is longer than the phase conductors; in case of accidental disconnection of the unit from the phase conductors, the protection conductor must be the last one to detach itself from the terminal.

DANGER: Electrical hazard
Install suitable systems for protection against indirect contact, in order to prevent lethal electric shocks.

4.4.2 Guidelines for electrical connection

- The mains voltage and frequency must match the specifications on the data plate
- Use a H05V2V2-F 3G0.75-1.5 multi-core power supply cable
- Protect the power supply cable against high temperatures, vibrations, collisions and abrasions.

4.4.3 Mounting the connector

<table>
<thead>
<tr>
<th>Phase</th>
<th>Action</th>
<th>Illustration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Insert the cable in the nut, ring and body of the cable gland</td>
<td><img src="image.png" alt="Cable Mounting Illustration" /></td>
</tr>
<tr>
<td>2</td>
<td>Strip the conductors as shown</td>
<td><img src="image.png" alt="Cable Strip Illustration" /></td>
</tr>
</tbody>
</table>
3. Press the lever of the connector

4. Insert the cores of the conductors in the respective holes of the connector and release the lever

5. Engage the connector in the body of the cable gland

6. Insert the ring in the seat of the body of the cable gland and tighten the nut on the body of the cable gland.
   Tightening torque: 2 Nm (1.5 lbf·ft)

7. Insert the connector in the socket of the unit
5 Start-up

5.1 Precautions

WARNING: Electrical hazard
Check that the unit is properly connected to the mains power supply.

WARNING:
It is prohibited to put combustible materials near the unit.

NOTICE:
Dry run of the unit is forbidden.

NOTICE:
It is prohibited to operate the unit with the on-off valve closed.

5.2 Before start-up

Check that:
- The instructions in Installation on page 5 have been followed.
- The system is full and vented.
- The minimum suction pressure is the same as that indicated in Technical Information on page 31.

5.3 Initial start-up

<table>
<thead>
<tr>
<th>Action</th>
<th>LED</th>
<th>ecocirc</th>
<th>ecocirc+</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turn on the power supply</td>
<td>Flashing yellow light</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note: the unit comes with stand-by set in the factory.
5.4 Venting the unit

Vent the unit:
• During filling
• During operation, to remove the dissolved gases (degassing)

<table>
<thead>
<tr>
<th>Action</th>
<th>LED</th>
<th>ecocirc</th>
<th>ecocirc+</th>
</tr>
</thead>
<tbody>
<tr>
<td>Keep the knob turned to until the unit is completely vented</td>
<td>Green flashing</td>
<td><img src="image" alt="ecocirc" /></td>
<td><img src="image" alt="ecocirc+" /></td>
</tr>
</tbody>
</table>

Notes:
• Once activated, degassing continues for 3 minutes irrespective of the set mode
• Depending on the features of the system, it may be necessary to activate degassing for more than 3 minutes.
6 Settings and operation

6.1 Knob settings

Turn the knob to select the required mode.

<table>
<thead>
<tr>
<th>Position of the knob</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Standby</td>
</tr>
<tr>
<td>1, 2, 3</td>
<td>Operation with constant pressure</td>

<tr>
<td>A, B, C</td>
<td>Operation with proportional pressure</td>
</tr>
<tr>
<td>I, II, III</td>
<td>Operation with constant pump speed</td>
</tr>
<tr>
<td>eAdapt</td>
<td>eAdapt function</td>
</tr>
<tr>
<td></td>
<td>Degassing function</td>
</tr>
</tbody>
</table>

6.1.1 Stand-by

Operation of the unit put on hold.

<table>
<thead>
<tr>
<th>Action</th>
<th>LED</th>
<th>ecocirc</th>
<th>ecocirc+</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turn the knob to</td>
<td>Flashing yellow light</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
6.1.2 Operation with constant pressure

The pressure remains constant irrespective of the system’s actual demand for flow. Suitable for underfloor heating systems and without characteristic curve. Select the level of head according to the features of the system and/or heat demand.

<table>
<thead>
<tr>
<th>Position</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Low performance curve</td>
</tr>
<tr>
<td>2</td>
<td>Intermediate performance curve</td>
</tr>
<tr>
<td>3</td>
<td>High performance curve</td>
</tr>
</tbody>
</table>

6.1.3 Operation with proportional pressure

The pressure is constantly adapted according to the system’s actual demand for heat. Suited for two-pipe heating systems. Select the performance according to the features of the system and/or heat demand.

<table>
<thead>
<tr>
<th>Position</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Low performance curve</td>
</tr>
<tr>
<td>B</td>
<td>Intermediate performance curve</td>
</tr>
<tr>
<td>C</td>
<td>High performance curve</td>
</tr>
</tbody>
</table>

6.1.4 Operation with constant pump speed

The speed is kept constant irrespective of the system’s actual demand for flow. Suited for one-pipe heating systems and domestic hot water systems. Select the speed according to the features of the system or number of valves that can be opened at the same time.

<table>
<thead>
<tr>
<th>Position</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>Constant pump speed I</td>
</tr>
<tr>
<td>II</td>
<td>Constant pump speed II</td>
</tr>
<tr>
<td>III</td>
<td>Constant pump speed III</td>
</tr>
</tbody>
</table>
6.1.5 eAdapt function, ecocirc+

Optimises energy consumption by constantly identifying the ideal duty point.

<table>
<thead>
<tr>
<th>Action</th>
<th>LED</th>
<th>Illustration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turn the knob to eAdapt</td>
<td>Green steady</td>
<td><img src="image" alt="Illustration" /></td>
</tr>
</tbody>
</table>

6.1.6 Degassing function

See Venting the unit on page 20.

6.2 Night mode, ecocirc+

Reduces energy consumption of the unit when the heating system is not in operation. A self-learning process identifies the suitable operating conditions; the electronic system registers lowering of the temperature and the unit automatically reduces the speed. The unit returns to the original duty point as soon as the system restarts and the water temperature increases.

<table>
<thead>
<tr>
<th>Phase</th>
<th>Action</th>
<th>LED</th>
<th>Illustration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Select an operating mode from 1, 2, 3, A, B, C, I, II and III</td>
<td>Steady green = night mode OFF</td>
<td><img src="image" alt="Illustration" /></td>
</tr>
<tr>
<td>2</td>
<td>Press the button (briefly) to activate or deactivate night mode</td>
<td>Steady yellow = night mode ON Steady green = night mode OFF</td>
<td><img src="image" alt="Illustration" /></td>
</tr>
</tbody>
</table>

Note: if night mode is still active when the power is turned off, it will be deactivated the next time the power is turned on again.
6.3 MY ecocirc App, ecocirc+

Available for iOS® or Android™ mobile devices with Bluetooth® wireless technology.
The MY ecocirc can be used to:
- Interact with the unit and obtain data during installation and maintenance
- Access technical information and supporting documentation
- Generate a work report
- Identify the most suitable model for a specific system
- Contact the assistance service.

6.3.1 Pairing the unit with a mobile device

<table>
<thead>
<tr>
<th>Phase</th>
<th>Action</th>
<th>Illustration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Open MY ecocirc on a mobile device</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Activate Bluetooth® connectivity</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Press and hold the button for a while: the LED flashes and the unit is available for pairing</td>
<td><img src="Ecocirc_M9000_A.ph" alt="Illustration" /></td>
</tr>
<tr>
<td>4</td>
<td>Touch ecocirc+... in the list of units detected by the mobile device</td>
<td><img src="Ecocirc_M9002_A.ph" alt="Illustration" /></td>
</tr>
<tr>
<td>5</td>
<td>Press the button briefly: the first 3 digits of the PIN appear on the display</td>
<td><img src="Ecocirc_M9002_A.ph" alt="Illustration" /></td>
</tr>
<tr>
<td>6</td>
<td>Enter the 3 digits in MY ecocirc</td>
<td><img src="Ecocirc_M9000_A.ph" alt="Illustration" /></td>
</tr>
</tbody>
</table>
7 Press the button again briefly: another 3 digits of the PIN appear on the display

8 Enter the 3 digits in MY ecocirc and confirm: pairing is complete

6.4 Starting at high torque

If the motor shaft is locked, for example due to limescale, the unit automatically makes several attempts to start at high torque. During this phase:

- The unit vibrates and makes a noise
- The LED is red and steady
- The error code E04 (ecocirc+) is shown on the display.

When locking is resolved, the unit continues to run normally (green LED).

6.5 Dry run signal

Protects the unit against dry running during start-up and normal operation:

- During the first 24 hours, the unit continues to run and the LED is red and flashing
- After 24 hours, the unit stops and the LED is red and steady
- The error code E10 (ecocirc+) is shown on the display.

See Troubleshooting on page 27.
7 Maintenance

7.1 Precautions

Before starting, make sure that the instructions shown in Introduction and Safety on page 5 have been fully read and understood.

**WARNING:**
Maintenance must be done by a technician possessing the technical-professional requirements outlined in the current regulations.

**WARNING:**
Always wear personal protective equipment.

**WARNING:**
Always use suitable working tools.

**WARNING:**
In the case of liquids that are excessively hot or cold, pay attention to the risk of injury.

**DANGER:** Electrical hazard
Before starting work, check that the power supply is disconnected and locked out, to avoid unintentional restart of the unit, the electronic drive and the auxiliary control circuit.

7.2 Spare parts ordering

Identify the spare parts with the product codes directly on the site www.lowara.com/spark. Contact Xylem or the Authorised Distributor for technical information.
8 Troubleshooting

8.1 Precautions

**WARNING:**
Maintenance must be done by a technician possessing the technical-professional requirements outlined in the current regulations.

**WARNING:**
Observe the safety requirements in the chapters on Use and Operation and Maintenance.

**WARNING:**
If a fault cannot be corrected or is not mentioned, contact Xylem or the Authorised Distributor.

8.1.1 Resetting errors

Errors may sometimes need resetting:
1. Disconnect the power supply.
2. Wait 1 minute.
3. Turn on the power supply.

8.2 Insufficient cooling or heat

<table>

                                 |             |                                         | If the problem continues, replace the unit |
| Foreign bodies in the unit | Clean the system; if the problem persists, replace the unit |
9 Technical Information

9.1 Operating environment

   Non-aggressive, non-explosive atmosphere, and not subjected to frost.

Temperature
-10 to 40°C (-14 to 104°F).

Relative air humidity
< 95% at 40°C (104°F).

NOTICE:
If the temperature and humidity exceed the stated limits, contact Xylem or the Authorised Distributor.

NOTICE:
To avoid the formation of condensate in the electronic drive and stator, the temperature of the liquid must be kept above room temperature.

9.2 Pumped liquid

Temperature
-10 to 110°C (14 to 230°F).

Water hardness
0 to 21°f (0 to 14°d).

Concentration of water/glycol mixture
≤ 50%.

9.3 Mechanical characteristics

Protection degree
IP 44.

Class of the device
I.

Minimum suction pressure @ head @ temperature of the liquid

<table>
<thead>
<tr>

10 Disposal

10.1 Precautions

**WARNING:**
The unit must be disposed of through approved companies specialised in the identification of different types of materials (steel, copper, plastic, etc.).

**WARNING:**
It is prohibited to dispose of lubricating fluids and other hazardous substances in the environment.

10.2 WEEE 2012/19/EU (50 Hz)

The crossed bin symbol on the appliance or on its packaging indicates that the product at the end of its useful life must be collected separately and not disposed of together with other mixed urban waste. Appropriate separate collection for the subsequent start-up of the disused equipment for recycling, treatment and environmentally compatible disposal helps to avoid possible negative effects on the environment and on health and favors the re-use and/or recycling of the materials it is composed of the equipment.

WEEE other than WEEE from private households ¹: The separate collection of this equipment at the end of its life is organized and managed by the producer. The user who wants to get rid of this equipment can then contact the producer and follow the system that it has adopted to allow the separate collection of equipment at the end of life, or select a supply chain independently authorized to manage.

Producer of EEE as per Directive 2012/19/EU:

(IE)
Xylem Water Solutions Ireland Ltd - 50 Broomhill Close - Airton Road - D24 Tallaght - Dublin 24

(MT)

(GB)
Xylem Water Solutions UK Ltd - Millwey Rise Industrial Estate – Axminster - Devon EX13 5HU

¹ Classification according to product type, use and current local laws
11 Declarations

11.1 EC Declaration of Conformity (Original)

Xylem Service Italia S.r.l., with headquarters at Via Vittorio Lombardi 14 - 36075 Montecchio Maggiore VI - Italy, hereby declares that the product:

Circulator ecocirc S, .. M, .. L, .. S+, .. M+, .. L+ (see rating plate)

fulfils the relevant provisions of the following European Directives:

- 2006/42/EC Machinery and subsequent amendments (ATTACHMENT II - physical or legal person authorised to compiling the technical folder: Xylem Service Italia S.r.l.)
- Eco-design 2009/125/EC and subsequent amendments, Regulations (EC) no. 641/2009 and (EU) no. 622/2012: EEI ≤ 0, ... see label on the manual and product (Annex I: “The parameter of reference for the most efficient circulators is EEI ≤ 0.20.”)

and the following technical standards:

Montecchio Maggiore, 23/05/2019

Amedeo Valente
(Director of Engineering and R&D)

rev.00

11.2 EU Declaration of Conformity (n. 39)

1. (EMCD) Apparatus/Product model: ecocirc S, .. M, .. L (see rating plate)
   (RED) Radio equipment: ecocirc S+, .. M+, .. L+ (see rating plate)
   (RoHS) Unique identification of the EEE: N. ecocirc S, .. M, .. L, .. S+, .. M+, .. L+

2. Name and address of the manufacturer:
   Xylem Service Italia S.r.l.
   Via Vittorio Lombardi 14
   36075 Montecchio Maggiore VI
   Italy

3. This declaration of conformity is issued under the sole responsibility of the manufacturer.

4. Object of the declaration:
   Circulator

5. The object of the declaration described above is in conformity with the relevant Union harmonization legislation:
   - ecocirc S, .. M, .. L: 2014/30/EU Directive of 26 February 2014 (electromagnetic compatibility) and subsequent amendments
   - ecocirc S+, .. M+, .. L+: 2014/53/EU Directive of 16 April 2014 (radio equipment) and subsequent amendments
   - ecocirc S, .. M, .. L, .. S+, .. M+, .. L+: 2011/65/EU Directive of 8 June 2011 (restriction of the use of certain hazardous substances in electrical and electronic equipment) and subsequent amendments

6. References to the relevant harmonized standards used or references to the other technical specifications, in relation to which conformity is declared:
   - ETSI EN 301 489-1 v.2.1.1 (2017-02), ETSI EN 301 489-17 V2.2.1 (2012-09), ETSI EN 300 328 v.2.1.1. (2016-11) and those of the previous point
   - EN 50581:2012

7. Notified body: -

8. Any accessories/components/software: -
9. Additional information:
RoHS - Annex III - Applications exempt from the restrictions: lead as a binding element in steel, aluminium, copper alloys [6(a), 6(b), 6(c)], in welds and electric/electronic components [7(a), 7(c)-I, 7(c)-II]

12 Warranty

12.1 Information

For information on the warranty refer to the documentation of the sale contract.
Xylem |ˈzɪləm|
1) The tissue in plants that brings water upward from the roots;
2) A leading global water technology company.

We’re a global team unified in a common purpose: creating innovative solutions to meet our world’s water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.

For more information on how Xylem can help you, go to www.xylem.com
